General Blanquet is practically ruler of Mexico City and the federal territory today.

The break between Huerta and his war minister came with the discover/ of an alleged plot against the provisonal President. Almost beside himself with rage when he discovered that his subordinates were in league against him, Huerta hurried to the Belem penitentiary, where 100 political prisoners were confined, and ordered their execution. He told the jailer to lead the 100, suspected of connection with the plot outside, and to shoot them against the
